Course Description:

In order to effectively implement and maintain an ISO 9000 Quality Management System, you must understand the requirements, consider their impact on the company, and manage an implementation plan. This workshop has been developed to assist the Executive Team in gaining a consistent understanding of the requirements of ISO 9000 and the registration process. The session is a workshop environment where the requirements of the standard are presented and the participants discuss how they impact the company, the degree of current compliance, and the steps needed to implement each item.

Objective:

To develop a consistent understanding of what ISO 9000 is, what it will do for your company, its impact on your company, and the expected time/resource commitment needed to attain registration.

Length: **4 Hours**

Content:

- What is ISO 9000?
- Requirement Clauses
- Impact Assessment of each clause on the organization
- What benefit will it bring the company
- Prioritizing activities based on payback
- The Registration Process
- The Audit
