Effective Teams in a Lean Environment

Lean Manufacturing is a focused approach to eliminate waste, problem prevention, improve methods of operation, work together across departments, and increase the effectiveness of the organization. Teams are the approach to make targeted improvements. This course will provide a path to getting people involved and organizing Process Improvement Teams that target areas of the company that need some fresh air. We will discuss missions for teams to work on, selecting team members, management support, coordinating team efforts so they don't step on each others project, and other issues you will face.

Who Should Attend: All individuals who are seeking to work more effectively in teams.

Presented by: Joan Gladky, The Cypress Group

1-Day Course

Fee: \$300

For dates, schedules and to register: www.sunysb.edu/sbucet

Courses are held at

Stony Brook University
Center for Emerging Technologies
